1. According to SNT-TC-1A the NDT instructor is
 - a. Defined
 - b. Defined in SNT-TC-1A 2006 but not in 2011
 - c. Not defined2.1 and 7.0
2. An NDT personnel qualification and certification written practice in accordance with SNT-TC-1A must describe the
 - a. Not described
 - b. Qualification only
 - c. Qualification and certification
 - d. Responsibility of each Level certification for determining the acceptability of material and components2.1.25 and 5.2
3. According to the recommendations of SNT-TC-1A, a person who performs without written instruction or supervision
 - a. NDT Level III
 - b. NDT Level I & Level II
 - c. NDT Level I
 - d. Trainee4.2, 4.3.1 to 4.3.3
4. According to SNT-TC-1A, an employer _____ establish a written procedure for the control of administration of NDT personnel training, examination and certification.
 - a. Shall
 - b. Should
 - c. Both the above is applicable
 - d. None of the above5.1

5. According to the SNT-TC-1A, the vision test record shall be maintained?

- a. For Two years
- b. For Six months
- c. For 12 Months
- d. As specified the written practice

9.4.5

6. According to the recommendations of SNT-TC-1A, the NDT Level III shall have a general familiarity with

- a. Conventional NDT methods
- b. 15 NDT methods
- c. Other appropriate NDT methods
- d. 12 NDT methods

4.3.3

7. In accordance with CP-189 technicians who attend a 40 hour training course

- a. Will be awarded with certificates
- b. May pass the final exam
- c. Must pass a final exam
- d. Are not required to pass a final exam

4.1.2

8. According to SNT-TC-1A, qualification is

- a. Demonstrated skill, demonstrated knowledge, documented training. and documented experience required to perform the duties of a specific job
- b. Skill, training and certification
- c. Knowledge, training and certification
- d. Skill, training and knowledge

2.1.19

9. According to SNT-TC-1A, an NDT Level III individual should
- a. Be capable of writing procedures
 - b. Be capable of training Level I and Level II
 - c. Provide training & certification
 - d. Approved signatory only

4.3.3

10. Level III recertification in accordance with CP-189 requires the individual be _____

- a. ASNT SNT-TC-1A Level III
- b. NDT Level III
- c. ISO 9712 Level III
- d. A current ASNT NDT Level III certificate holder

8.2

11. According to SNT-TC-1A a trainee

- a. Shall report with the help of instructions
- b. Shall not independently conduct, interpret, evaluate, and report the results of an NDT test
- c. Shall report with guidance of Level III
- d. Is not defined

4.2

12. CP-189 requires that development, administration and grading of Level II practical examination be done by

- a. Company NDT Level III
- b. ASNT NDT Level III
- c. Chief examiner
- d. Employer

6.4.1.1

13. A certified RT Level II radiographed several castings on March 7th to 10th. It is discovered that his vision examination expired on 20th of Feb which of following is correct?

- a. The individual certificate should have been suspended when the vision examination expired
- b. Still a grace time of 15 days shall be accepted
- c. One month of vision shall be added as grace time to conduct his vision exam
- d. Vision certificate shall be accepted only with the time period

CP-189 7.2

14. An outside agency Level III has developed an employer written practice. The company quality assurance manager administered one of the exams to a Level II candidate. The company NDT foreman graded the exam using the answer key prepared by Level III consultant. According to the SNT-TC-1A, which person cannot certify the technician?

- a. Outside Level III agency
- b. QA manager
- c. Company president
- d. NDT foreman

2.1.2, 2.1.4 2.1.9, 9.3

15. As per SNT-TC-1A, an NDT method examination is given to Level II candidates by a member of company management. The exams are then graded by the company secretary in absence of NDT Level III, Is this situation acceptable?

- a. Yes any member of management may approved this arrangement
- b. Yes as long as the NDT Level III has delegated these duties as stated above and recorded
- c. Yes there is no such requirement to address this in SNT-TC-1A
- d. Yes the company cannot shut down operation because the NDT Level III was not available to perform the function

8.1.1 and 8.1.2

16. As per SNT-TC-1A, for Level III personnel the composite grading shall be determined by simply averaging the results of

- a. The basic, method, specific and practical exams
- b. The basic, specific and practical exams
- c. The basic, method and practical exams
- d. General, specific and practical exams

8.1.4 and 8.6.4

17. According to SNT-TC-1A, NDT test methods may be further subdivided into limited disciplines or techniques to meet specific employer needs. These certifications are considered

- a. Level II Limited certifications
- b. Trainee
- c. Level I limited
- d. Level I

2.1.13 and 4.1

18. An NDT Level III candidate correctly answered 45 out of 60 basic examination questions, 68 out of 90 in method exam and 80% the practical exam. The specific score shall be a minimum of _____ according to SNT-TC-1A.

- a. 17 out of 20
- b. 18 out of 20 or more correct out of 20
- c. Both a & b

8.1.5 and 8.6.4.1

19. In accordance with CP-189 when a candidate for a Level I and Level II certificate is working in two NDT methods, what minimum experience must be met.

- a. 140 hours in each methods
- b. As per the specification of employer in the both methods
- c. Described in SNT-TC-1A or employer written practice in both methods
- d. The candidate must meet the required minimum method hours and total NDT hours for each method

4.1.1, Appendix A and B

20. In accordance with SNT-TC-1A certification is defined as indicating that a person has written has

- a. Experience & training knowledge
- b. Written testimony of qualification
- c. Skill training required for personnel
- d. Intend to be conferred by an organization hired by employer

2.1.2

21. CP-189 recognizes three different categories by which NDT personnel may lose their certification with an employer, these categories are

- a. Termination, suspension and revocation
- b. Expiration, revocation, and suspension
- c. Both a & b
- d. None of the above

7.0

22. According to CP-189, a UT practical examination for a person who will be performing digital thickness measurement, straight beam testing and angle beam testing shall consist of at least

- a. Angle beam and straight beam digital thickness measurement
- b. Digital thickness A-scan and B-scan
- c. Digital thickness, angle beam, straight beam, through transmission, TOFD, and phased array
- d. All of the above

6.3.3.1 and 6.3.3.2

23. According to CP-189 an individual certification in a method shall be suspended by the employer if the individual has not performed the duties in that method during the consecutive twelve months. In SNT-TC-1A suspension is _____.

- a. Not addressed in employer written practice
- b. Suspension shall be clearly stated in advance
- c. To be addressed in employer written practice

11.1

24. According to the SNT-TC-1A experience of the NDT person is defined

- a. As time spent in organized training programs
- b. Education and training
- c. Work in a specific NDT method under the direction of qualified supervision
- d. Work activities accomplished in a specific NDT method under the direction of qualified supervision including the performance of the NDT method and related activities such as time spent in organized training programs.

2.1.10 and 6.0; 5th ed, 119, it

25. According to SNT-TC-1A, the minimum qualification for the personnel assigned the responsibility of interpretation and evaluating NDT results to applicable codes and standards and specifications.

- a. Level I with supported instructions
- b. Level II
- c. Level III
- d. Instructor

4.3.1 and 4.3.2

26. According to SNT-TC-1A, Level I and Level II specific examinations should include questions which cover _____.

- a. Basic principles of the applicable test method
- b. NDT techniques that may be encountered to the degree required by the employer's written practice
- c. The ability to operate necessary NDT equipment
- d. Proficiency in performing in the applicable NDT method and evaluating the results to the degree of responsibility as described in the employer's written practice

8.4.1

27. SNT-TC-1A individual may be recertified based upon examination to the former Level of certification after termination of employment and upon employment with a new employer without additional training if the individual _____.

- a. Is being recertified within six months of termination
- b. Was working simultaneously for both employers
- c. Is being recertified within 24 months of leaving the previous employer
- d. Was hired by the new employer within 12 months of leaving the previous employer and has proof of prior certification

13.2

28. For an individual with less than a high school education the number of training hours recommended by the SNT-TC-1A

- a. Should increase to 25%
- b. May be altered to depending upon the candidate's actual educational level
- c. May be altered from those published
- d. Education is not the part of SNT-TC-1A

Table 6.3.1 A Note 3

29. Which of the following is true regarding NDT Level II specification examinations according to SNT-TC-1A?

- a. The minimum number of questions is 20 for a helium mass spectrometer
- b. Administration and grading of the exam is a Level III responsibility and no one else may perform his task
- c. The exam should cover the theory and principles of the method as determined by the employer and stated in the written practice
- d. The exam should cover the codes and acceptance criteria used in the employer's NDT procedures

8.4.1, 8.4.2, Table 6.3.1 A, 8.1.2, and 8.3.1

30. According to SNT-TC-1A, who is responsible for administration and grading of examinations?

- a. An NDT Level III
- b. An ASNT NDT Level III certificate holder
- c. Employer
- d. ASNT

8.1.2

31. According to CP-189, the candidate taking a practical exam shall identify:

- a. All relevant and nonrelevant indications
- b. 90% of all recordable conditions
- c. All applicable discontinuities and conditions which the candidate is expected to find and previously specified and documented by Level III
- d. All discontinuities and conditions observed when the technique was verified by the Level III

6.4.3

32. According to SNT-TC-1A, when only limited familiarity with a method is needed, the employer should _____.

- a. Issue a limited certification
- b. Require additional training to that required for the method specifically in that technique
- c. Add additional experience
- d. Follow employer written practice

6.3.1

33. CP-189 requires that the NDT instructor be designated by _____.

- a. A senior NDT instructor
- b. an NDT Level III
- c. by the employer
- d. by an ISO 9712 Level III

4.4.2

34. According to SNT-TC-1A, a trainee should work under

- a. Level I
- b. Level II only
- c. Under Level III
- d. Work with certified individual

4.2

35. According to SNT-TC-1A, certification of all levels is the responsibility of the

- a. Employer and shall be conducted strictly in accordance with SNT-TC-1A
- b. NDT Level III and shall be conducted in accordance with the written practice
- c. NDT Level III and shall be conducted strictly in accordance with SNT-TC-1A
- d. Employer and shall be conducted strictly in accordance with the written practice

9.1

36. SNT-TC-1A recommends that an individual in the process of being qualified to Level I
- a. should work with an NDT Level I and Level II
 - b. should perform a specific standardizations and specific evaluation in accordance with written instructions approved by a Level III
 - c. should be qualified to setup and standardize equipment
 - d. the individual should be qualified to perform specific limited applications

4.2

37. According to SNT-TC-1A, a candidate with a four year college degree in fine arts will be required to complete training and experience _____.
- a. Same as a high school degree
 - b. Will be the same as high school equivalency holder
 - c. 50% the training and 40% experience required in Table 6.3.1 A
 - d. May be adjusted based upon education as described in the employer's written practice

Table 6.3.1 A, Note 3

38. The selection of NDT methods for a given product should be based primarily upon
- a. Availability of qualified NDT personnel
 - b. Characteristic of product and it's intended to use
 - c. Availability of calibrated NDT equipment and materials
 - d. The employer written practice

~44, rt, 1

39. According to SNT-TC-1A, what is the lowest level that can perform an NDT test without a written procedure?

- a. Trainee
- b. Level I
- c. Instructor
- d. Level II

4.3.2

40. According to SNT-TC-1A, which statement is true regarding the use of the outlines in CP-105?

- a. The outlines are mandatory and must follow the sequence of the outline
- b. The outlines are mandatory, but may be further expanded at the discretion of the NDT level III
- c. The outlines are mandatory, but the NDT Level III must further specify the time spent on each topic
- d. The outlines are recommended and the employer has the license to expand or delete topics according to the needs of the employer

CP-105, para 1.3 and 1.5; SNT-TC-1A, para 7.3

41. According to CP-189, which statement is true regarding the use of the outlines in CP-105 for NDT Level I and II?

- a. The outlines are mandatory and must follow the sequence of the outline
- b. The outlines are mandatory, but may be further expanded, the order altered, and depth defined at the discretion of the NDT level III
- c. The outlines are not mandatory, but the NDT Level III must further specify the time spent on each topic
- d. The outlines are recommended and the employer has the license to expand or delete topics according to the needs of the employer

CP-105, para 1.3 and 1.5; CP-189, para 4.1.1

42. According to CP-189, which statement is true regarding the use of the outlines in CP-105 for NDT Level III training?

- a. The outlines are mandatory and must follow the sequence of the outlines
- b. The outlines are not recommended, specifically, but may be used by the employer, further expanded and order altered at the discretion of the employer NDT Level III
- c. The outlines are mandatory, but the NDT Level III must further specify the order, time spent on each topic, and include additional topics as needed.
- d. The outlines are recommended for Level III and the employer has the license to expand or delete topics according to the needs of the employer

CP-105, para 1.3 and 1.5; CP-189, para 4.1.2 to 4.1.4

43. According to CP-189, the practical exam necessitates that a candidate identify:

- a. All relevant and nonrelevant indications
- b. 99% of recordable indications
- c. All conditions previously documented and specified by the Level III
- d. Only those conditions observed when the technique was verified by the Level III as being properly performed.

6.4.3

44. According to CP-189, an individual may be qualified directly to Level II with no time as a Level I provided that the:

- a. Training for Level I and II is the same
- b. Experience for Level I and II is the same
- c. Required hours for Level II are greater than those hours for Level I
- d. Training and experience hours meet the sum of required hours for Level I and II

Appendix A, Note B

45. According to CP-189, a candidate to be certified as an NDT Level III must:

- a. Possess a currently valid ASNT NDT Level III certificate in the applicable method
- b. Pass Basic, method and specific examinations administered by the employer
- c. Pass Basic method and specific examinations administered by ASNT
- d. Possess documentation verifying five (5) years of experience in the applicable test method

2.2.1

46. According to SNT-TC-1a:

- a. There can only be three levels of qualification: Level I, II and III
- b. There are four Levels of qualification: Level I, II, III and Instructor
- c. An employer may subdivide the three basic levels of qualification for situations where additional levels are deemed necessary
- d. There are six Levels of qualification: trainee, instructor, Level I, II, III, and II Limited.

4.1

47. In regard to SNT-TC-1a, which of the following is correct?

- a. An employer must follow all classifications of NDT personnel
- b. Covers all product codes, standards, and customer specifications
- c. Is specific and does not allow variation in classification of NDT personnel
- d. An employer must use as a minimum when so specified by the customer

Forward 2nd para

48. SNT-TC-1a recommends the use of at least one flawed specimen in the practical examination. If the employer's written practice does not require inspecting a flawed specimen as part of the practical examination, which statements below is correct?

- a. The employer's certification program would not meet SNT-TC-1a requirements.
- b. Customers must accept this modification because it is documented in the written practice
- c. Customers can choose not to accept the employer's program even if it does meet SNT-TC-1a guidelines
- d. The candidates would not be capable of performing their inspections as necessary

8.5.2

49. General written examinations written in accordance with SNT-TC-1a for Level I and II personnel should address:

- a. Complex principles in the applicable test method
- b. Basic principles of all methods
- c. Complex principles of all methods
- d. Basic principles of the applicable method

8.3.1

50. The employer wants to create a limited Level II certification for magnetic particle testing using only the yoke technique. When the NDT Level III develops the examination, which would not be appropriate?

- a. Questions regarding the basic magnetic principles
- b. Questions regarding other magnetic particle techniques
- c. Questions regarding basics of magnetic particle size and shape
- d. Questions regarding the design of yokes

2.1.13, 4.1 and 6.3.1

51. The recommended maximum recertification interval of PdM Level I and II individuals according to SNT-TC-1a is:

- a. Ten years
- b. Five years
- c. Three years
- d. As defined in the employers written practice

12.2

52. According to SNT-TC-1a, which of the following items are to be included in the records of certified NDT personnel?

- a. Evidence of continued satisfactory performance
- b. Examination results of the past certifications
- c. Vision examination results for the current certification period
- d. A valid endorsement of a certified NDT Level III

9.4.5

53. According to CP-189, in no case shall an examination be prepared or administered by _____.

- a. A Level I
- b. A Level II
- c. An NDT instructor
- d. The individual being examined

6.6

54. A new employee takes a Level I and II class for a particular method. The employer determines that the employee is working equivalent to a Level II. Does the employee need to complete the Level I work experience hours as well as Level II hours?

- a. Once the Level II classroom hours are completed, the Level I work experience does not count.
- b. The employee must complete the Level I requirements as a Level I before progressing to the Level II requirements
- c. The employee must have the number of combined Level I and Level II hours to certify directly to Level II
- d. The employee can certify to Level II without Level I work experience if Level I and II classes were completed.

CP-189, Appendix A, note B; SNT-TC-1a, Table 6.3.1A, Note 1

55. According to CP-189, a new employee provides documentation of previous Level I certification in ET. With 240 hours of experience and a copy of a certificate of attendance from a 40 hour Level I seminar. No final was given, and no score was provided. Select the correct statement below:

- a. This individual may be certified Level II in ET.
- b. This individual has met the requirements for Level I in ET and may take the company's examinations for Level I certification
- c. The initial Level I certificate was invalid as it was based on classroom training that did not include a final exam
- d. As long as a Level III signed the certificate, the individual can be certified directly to Level I without examination

4.1.2

56. There are three basic levels of qualification. While in the process of being initially trained, qualified and certified, an individual should be considered a trainee. A trainee _____.

- a. May work independently, provided all test results are approved by a Level III
- b. Should work with a certified individual
- c. May work independently, provided written instructions are available
- d. Must work under direct supervision of a Level III

CP-189, 3.6; SNT-TC-1a, 4.2

57. Questions shall be developed which represent a cross section of the body of knowledge contained in ASNT CP-105 applicable to each method and NDT Level for the _____ examination.

- a. Practical
- b. Specific
- c. General
- d. Technical performance

CP-189, 6.3.1

58. As recommended in SNT-TC-1a, specific examinations for Level I and II candidates for certification:

- a. Should include specifications and/or codes used by the employer, including acceptance criteria
- b. Should include specifications and/or codes used by the employer, excluding acceptance criteria
- c. Should not include operating procedures
- d. Should be limited to a maximum of 40 questions

8.4.1 and 8.4.2

59. Vision test for color contrast differentiation are recommended in SNT-TC-1a to be performed at the time of:

- a. Initial certification
- b. Initial certification and every year thereafter
- c. Initial certification and every three years thereafter
- d. Initial certification and every five years thereafter

8.2.2

60. According to SNT-TC-1a, which of the following items must be included in the qualification records for inspectors?

- a. Evidence of training course failures for methods not currently certified
- b. Individual's shift assignment and working hours
- c. Results of expired vision examinations
- d. Statement indicating satisfactory completion of training

9.4 and 9.4.4

61. According to SNT-TC-1a, who is responsible for the administration and grading of examinations for Level I, II, and III personnel?

- a. The employer
- b. An NDT Level III
- c. An outside agency Level III
- d. The retinal ASNT NDT Level III

8.1.2

62. According to SNT-TC-1a, a candidate is required to understand an inspection procedure for UT thickness in the:

- a. Basic examination
- b. Method examination
- c. Specific examination
- d. General examination

8.4.1

63. When a contract specifies SNT-TC-1a, acceptability of a company's personnel qualification and certification written practice must:

- a. Strictly adhere to the intent of the document
- b. Be agreed upon between the purchaser and supplier
- c. Use the contracting agency's personnel qualification program
- d. Only be used as a guideline in developing the employer's program

Forward, 2nd para

64. According to SNT-TC-1a, NDT personnel who failed to attain the required grades may be reexamined after waiting at least:

- a. 7 days
- b. 14 days
- c. One month
- d. 30 days or receiving suitable additional training as determined by the NDT Level III

8.7

65. According to the recommendations of SNT-TC-1a, candidates for certification to Level I, II, or III who are being administered written specific examinations should:

- a. Be permitted access to scientific calculators and math tables as needed when equations are included in the examination
- b. Be permitted access to recommended training references, charts, and graphs to be used to derive answers to some questions
- c. Be permitted access to necessary data, charts, specifications, codes, and the like to derive answers to some questions
- d. Not have access to reference data since a closed book examination is required

2.1.5, and 8.4

66. After an NDT Level III is tested by an outside agency, the technician is sent a letter signifying that the technician has “passed” and no grade is given. The technician’s employer may regard this as:

- a. An improper response from the outside agency
- b. A 70% score for the basic and method examinations
- c. An 80% score for that particular examination
- d. An 80% score for the basic and method examinations

8.1.6

67. In accordance with the recommendations of SNT-TC-1a, qualification indicates that a person has:

- a. Documented training in the method adequate to perform a specific job
- b. Written testimony verifying their qualification in the method
- c. On-the-job experience of at least one year
- d. Documented training, skills, knowledge and experience

2.1.19

68. According to CP-189, a candidate attended a 60-hour ultrasonic testing Level I and II seminar and was issued certification of attendance by the subject matter experts that taught it; therefore,

- a. Credit for the 60 hours would be given as long as the Level III approved the content of the seminar
- b. Credit would not be given if no final exam was given
- c. Credit would not be given as the instructor must be a Level III
- d. Credit would be given only for the 40 hours need for the Level I

4.1.2

69. In the certification of NDT personnel to SNT-TC-1a, the employer must assure personnel have been qualified in accordance with:

- a. The appropriate industry segment qualification specification
- b. The applicable customer’s written practice
- c. The required written qualification of minimum quality requirements
- d. A developed written practice

2.1.25 and 5.0

70. The ASNT NDT Level III Basic covers the administration of certification programs developed in accordance with _____.

- a. Mil-Std-271
- b. NAS410
- c. ANSI/ASNT CP-189
- d. ASME Section V

~5th ed SG, 59; 4th ed SG 51, left

71. A candidate is being examined to be certified to RT Level III per CP-189. In the practical examination, the candidate shall perform which of the following:

- a. Demonstrate the ability to operate the X-ray equipment in the examination room
- b. Demonstrate the ability to examine a weld specimen in the examination room
- c. Prepare a procedure according to employer's needs
- d. Interpret film in the examination room

6.4.6

72. Specific examination should address questions about all but one of the following:

- a. Equipment
- b. Operating procedures
- c. Techniques of application
- d. General knowledge

SNT TC-1a, 8.3 and 8.4; CP-189, 6.2.2 and 6.3.2

73. In accordance with SNT-TC-1a, an individual may be recertified to the former level of certification after termination of employment, and upon employment with a new employer without additional training, provided the individual:

- a. Holds a valid ASNT NDT Level III certificate
- b. Certification did not expire during the termination
- c. Has been certified as a Level II or III by the previous employer
- d. Has been certified as a Level III by their previous employer

13.2

74. A written practice uses the minimum recommendations of SNT-TC-1a. Do the following NDT Level II examination scores meet the requirements of the written practice? General 69%, Specific 98%, and Practical 86%

- a. Yes, the composite score is above 80%
- b. No, the minimum passing grade for any examination is 80%
- c. No, the general examination score is below 70%
- d. No the composite score is less than 80%

8.1.4 and 8.1.5

75. According to SNT-TC-1a, an exam given by a subordinate. Is this acceptable?

- a. Yes, provided the Level III has delegated this in writing
- b. Yes, as long as the company's written practice allows this
- c. No, this is not acceptable
- d. Yes. This is not addressed in SNT-TC-1a

8.1.8

76. In accordance with the guidelines of SNT-TC-1a, all NDT personnel shall be recertified:

- a. When the employee takes a leave of absence
- b. When the employee is subcontracted to another company
- c. In accordance with the employer's written practice
- d. If the employee does not perform in an NDT method for seven months

12.0

77. Unless stated otherwise in the written practice, topics in CP-105 outlines may be deleted or expanded:

- a. At the employer's discretion
- b. For the Level I certification
- c. For the Level II certification
- d. For the Level III certification

SNT-TC-1a, 7.1 and 7.3

78. According to SNT-TC-1a, Level II practical examination should:

- a. Require interpreting and evaluating results on at least two test specimens per method
- b. Require the detection of at least 90% of the discontinuities and conditions specified by the Level III
- c. Contain check points that failure to successfully complete will result in failure of the examination
- d. Require that the candidate develop a written procedure or technique

8.5.5 and note

79. Example NDT questions for NDT Level I and II may be found in _____.

- a. ANSI/ASNT CP-105
- b. ANSI/ASNT CP-189
- c. ASME Section V
- d. SNT-TC-1a, Appendix A

Not present in 2024 Revision

80. Training course outlines for a program designed around SNT-TC-1a are contained in which of the following publications:

- a. SNT-TC-1a (2020)
- b. NDT Handbook Volume 10, Nondestructive Testing Overview
- c. ANSI/ASNT CP-105
- d. ASTM Annual Book of Standards Volume 3.03

7.3

81. The employer who purchases outside training services is responsible for:

- a. Conducting periodic quizzes
- b. Conducting final examinations
- c. Assuring the requirements of the written practice are met
- d. Assuring the client approves the service

SNT-TC-1a, 7.4; CP-189, 4.5

82. According to SNT-TC-1a, at what interval should near vision acuity be checked?

- a. at the time of initial certification
- b. at the time of initial certification and every year thereafter
- c. at the time of initial certification and every three years thereafter
- d. at the time of initial certification and every five years thereafter

8.2.1

83. When an employer is evaluating purchase of outside training services, who is responsible to ensure the training meets the employers written practice?

- a. The training service provider
- b. The employer
- c. The NDT Level III
- d. The NDT Level II

SNT-TC-1a, 7.4

84. According to SNT-TC-1a, personnel certification records should be maintained on file for:

- a. One year
- b. Three years
- c. Five years
- d. The duration specified in the written practice

9.4

85. The recommendations of SNT-TC-1a permit an outside agency to furnish NDT Level III services provided:

- a. No company NDT Level III is available
- b. NDT Level III qualifications have been reviewed by the contracting company
- c. The individual has a current ASNT NDT Level III certification in the applicable method.
- d. The outside agency NDT Level III is certified by the contracting company

8.1.6 and 9.3

86. Training hours listed in SNT-TC-1a may be adjusted as described in the employer's written practice:

- a. Depending on a candidate's actual education level
- b. But may not be less than those published for Level I
- c. But may not be less than the sum of those published for Level I and Level II
- d. And should be increased by 25% for Level III

Table 6.3.1 A, Note 3

87. Topics contained in CP-105:

- a. Must match the topical outlines of SNT-TC-1a
- b. Must be presented and taught by the employer for each method
- c. May be deleted or expanded to meet the employer's application
- d. May not be altered for limited certifications

SNT-TC-1a, 7.3, and 7.1 and CP-105

88. Nondestructive testing methods may be further subdivided into disciplines or techniques to meet specific employer needs. These certifications are considered:

- a. Provisional certifications
- b. Limited certifications
- c. Not allowed under SNT-TC-1a
- d. For information only

SNT-TC-1a, 6.3.1

89. According to SNT-TC-1a, the basic levels of qualification are:

- a. Trainee, Level I, Level II and NDT Instructor
- b. Level I, Level II and Level III
- c. Trainee, Level I, Level II, and Level III
- d. Level I, Level II, Level II Limited, and Level III

4.3

90. Which of the following meets the recommendations of SNT-TC-1a if an employer feels that more questions are needed for a Level II general examination in a particular NDT method?

- a. The employer must state in their written practice the same number of questions recommended in SNT-TC-1a for the particular NDT method
- b. The employer may only modify the number of questions for general examinations
- c. The employer's written practice may allow more questions than the number of questions stated in SNT-TC-1a
- d. The employer may decrease the number of questions for the method examinations

5.1, 5.2, Table 8.3.3 and 8.3.4

91. According to CP-189, there are three different categories by which NDT personnel may lose their certification with an employer. These categories are:

- a. Expiration, revocation, and ethics violation
- b. Non-renewal, expiration, and suspension
- c. Suspension, revocation, and ethics violation
- d. Expiration, revocation, and suspension

7.0

92. The employer's written practice:

- a. Should be maintained on file
- b. Should be established for the control of NDT certifications
- c. Should be reviewed and approved by the employer's NDT Level III
- d. Shall be reviewed and approved by the employer's NDT Level III

SNT-TC-1a, 5.5; CP-189, 5.3

93. When a company uses an outside agency Level III to develop their written practice and examinations, according to SNT-TC-1a, who is responsible for certifying technicians if the examinations are administered by the quality assurance manager and graded by the company's NDT foreman?

- a. Outside agency Level III
- b. Outside agency certification manager
- c. Designated company representative
- d. Designated outside agency Level III

2.1.3 and 2.1.4 and 8.1.7

94. The amount of training time spent on each topic in each method of CP-105:

- a. Should be determined by the NDT Level III
- b. May not be less than specified for each level
- c. Is defined in CP-189
- d. Is defined in SNT-TC-1a

CP-189, 4.1.1; SNT-TC-1A, 7.3; CP-105

95. In accordance with the recommendation of SNT-TC-1a, the NDT Level III should be capable of:

- a. Designating the particular NDT methods, techniques, and procedures to be used
- b. Certifying personnel in all methods listed in SNT-TC-1a
- c. Fracture mechanics calculations
- d. Certifying personnel in NDT methods required in ISO 9712

4.3.3

96. According to SNT-TC-1a, for Level III personnel the composite grade should be determined by simple averaging the results of:

- a. The basic, method, specific and practical examinations
- b. The basic, method and practical examinations
- c. The basic, specific, and practical examinations
- d. The general, specific and practical examinations

8.1.4 and 8.1.5

97. Test technique is defined in _____.

- a. CP-189
- b. The employer's certification process
- c. CP-105
- d. SNT-TC-1A

SNT-TC-1a, 2.1.13, 2.1.14, 2.1.22, 4.3.3, 5.3, 12.3; CP-189, 2.1.25, 3.2, 6.3.3.2

98. What is not defined in CP-189?

- a. ACCP NDT Level 3
- b. ASNT NDT Level 3
- c. Responsible Level 3
- d. ASNT PdM Level 3

CP-189 2.2.1; SNT-TC-1a 2.1.2

99. In addition to the ASNT Basic and Method exams, what exams are required to become an ACCP NDT Level III certificate holder in a method?

- a. Specific and Procedure preparation exams
- b. Procedure Preparation and Practical exams
- c. Specific and Hands-On Practical exams
- d. Practical exam

CP-1, 7.2

100. Which best describes the examinations required for ACCP Level II certification?

- a. General and Specific
- b. General and Practical
- c. General, Specific, Practical and Instruction
- d. General, Specific and Practical

ASNT Program Information Document CP-1, 7.1, 7.1.3 last sentence

101. Which of the following is not addressed in SNT-TC-1a?

- a. ASNT NDT Level III
- b. ACCP NDT Level III
- c. Responsible Level III
- d. PdM Level III

2.1.26, 4.3.3, 4.3.4, 6.3.2, 8.6, 8.6.5
